

Pre-registration of entries for the 2011 Davidson County Agricultural Fair

This year we would like to implement a pre-registration process at the Davidson County fair to cut down on fair entry lines and waiting times. Specifically individuals entering numerous items can do so in advance from their own home.

Here's how the process will work:

- (1). Whether you received a new fair catalogue in the mail or not, go by the Davidson County Cooperative Extension to secure a fair entry tags and preregistration form.
- (2). Using the catalog as a guide, tag your entries and place the tag on your entry.
- (3). When you have tagged the items, record this information on the Pre-registration form.
- (4). **We ask that you return the pre-registration form no later than Wednesday, September 16th** in order for us to enter these in the fair books prior to the Sunday, **September 20th** entry date.

On Sunday go through the line for items where the entries will be checked against the pre registration form to be sure everything is correctly tagged and listed. If you do not bring an item you have listed an adjustment can be made to the entry form at that time. However, if you bring additional items you will need to go through the normal process to enter those items not pre registered.

We hope that you will be interested in this option and pre register all your items. We also appreciate your assistance in making this improvement.

If you have questions about this process of entry categories call:
